

Vedran Kovačević

Frontend-Focused Full-Stack Developer | 10+ Years in E-commerce

vedrank85@gmail.com ❖ +38765660336 ❖ Banjaluka, BiH ❖ [LinkedIn](#) ❖ [Portfolio](#)

SUMMARY

Front-End Developer with 10+ years of professional experience building high-performing e-commerce platforms and CMS-based solutions for international markets. Extensive background in developing responsive, conversion-focused web applications using HTML, CSS, JavaScript, React & WordPress, with growing expertise in Next.js and Laravel for full-stack development. Experienced in REST API integration, performance optimization, and delivering scalable, user-centric solutions. Former Team Lead with a proven track record of mentoring developers, improving development workflows, and collaborating across cross-functional teams to deliver reliable, business-driven products.

WORK EXPERIENCE

Front-End Team Lead @ Infomedia d.o.o.

May 2023 – March 2026

- Led front-end development for 20+ client websites and e-commerce platforms, improving load performance and mobile responsiveness across all projects
- Managed and optimized WordPress, Webflow, and Shopify platforms, increasing conversion rates through UI/UX enhancements and feature improvements
- Conducted final QA reviews, ensuring cross-browser compatibility and high usability standards before deployment
- Mentored and trained 5+ junior developers, accelerating onboarding and enabling faster transition into production work
- Collaborated with designers and project managers to deliver responsive, production-ready interfaces, reducing revision cycles and improving delivery timelines

Senior Front-End Developer @ Infomedia d.o.o.

January 2020 – May 2023

- Developed and maintained scalable front-end solutions for multiple client projects across e-commerce and CMS platforms
- Built reusable components and templates to streamline development workflows and improve consistency across projects
- Optimized existing websites by resolving performance bottlenecks and implementing new features
- Worked closely with cross-functional teams to translate UI/UX designs into functional, high-quality front-end implementations

Front-End Developer @ Infomedia d.o.o.

May 2015 – January 2020

- Developed responsive websites and landing pages using HTML, CSS, and JavaScript
- Maintained and updated client websites, ensuring functionality, performance, and content accuracy
- Supported development of digital wholesale catalogs and product presentation systems
- Assisted in implementing CMS-based solutions for client projects

Front-End Developer @ Logik Labs

February 2023 – January 2025

- Developed responsive web applications using React and Tailwind CSS
- Assisted Laravel development with REST APIs, Blade templates, and frontend features
- Contributed to Next.js pages, routing, and data fetching

QUALIFICATIONS

Bachelor's Degree in Information Technology and Design

University of Business Studies, Banjaluka (2013)

UX Design & Front-End Development Internship

OGO Sense, Banjaluka (2016)

SKILLS

ADDITIONAL PROJECT EXPERIENCE

Internal CMS for E-commerce Pages

- Collaborated with backend developers to build a system generating 100+ landing pages daily across multiple European markets and languages.
- Developed reusable front-end templates and implemented custom features with integrated A/B testing, analytics, and tracking.

Wholesale Catalog Platform

- Built and maintained multilingual catalog systems featuring authentication, advanced product filtering, and CRM integration.
- Improved usability and streamlined distribution workflows for business clients across European markets.

Language Learning Platforms

- Developed and maintained online learning platforms serving more than 10,000 users.
- Customized WordPress and LearnDash solutions to deliver scalable educational content and improve the learning experience.

DraftLens - League of Legends Draft Assistant

- Built a desktop application using React and Electron that integrates with the League Client API to assist players during champion select.
- Implemented automatic champion detection, spell and passive viewer, champion trait analysis, counter recommendations, and context-aware item suggestions.
- Designed a responsive user interface focused on speed, usability, and real-time data presentation while ensuring read-only interaction with the game client.

EloCoach – Portfolio Project

- Developed a full-stack web application connecting League of Legends players with professional coaches using Laravel (REST API) and React.
- Implemented user authentication, RESTful API communication, role-based functionality, responsive UI, and MySQL database integration
- Built reusable React components with Tailwind CSS, focusing on clean architecture, maintainable code, and scalable full-stack development.

TaskFlow – Trello Clone

- Developed a Trello-inspired full-stack project management application using Next.js, React, Prisma, and PostgreSQL.
- Implemented JWT authentication, drag-and-drop boards, lists and cards, member management, labels, comments, and responsive layouts.
- Built a modern frontend with Tailwind CSS and integrated backend services using Axios, Prisma ORM, and

a scalable database architecture.
